

For more than ten years, the staff at *Visionart* has enabled our clients to define and execute their own personal styles, whether it be corporate office interior design, visual merchandising for retail windows, original and spectacular Holiday decorations, residential interiors, or simply a two-hour “makeover” using what you already have.

We bring a fresh perspective and energy to our design work, and we are known for our attention to detail and for listening to what our client wants. Even more importantly, we are known for staying within our client’s budget and time frame.

Whether you want traditional elegance or “*fashion-forward pizzazz*,” everyone at *Visionart* is dedicated to taking the fear out of design. We assist our clients, to not only realize their design ideas, but to have a lot of fun doing it!
